

DAVES™ 4.4: Digital Audio Video Entertainment System

Dimensions: 16.75" W x 1.75" H x 9.75" D
Zones: 32
Sources: 2
Cable: 1000' per zone
Chassis: standard rack unit

The DAVES™ 4.4 system delivers high quality audio/video at an affordable price. Its simple yet elegant design provides unequalled sound quality with cables that run up to 1000 feet per zone. It distributes audio/video signals to 4 listening areas using only a single category 5 cable. Furthermore, each zone is capable of independently selecting any source. By cascading an additional DAVES™ 4.4 system, it can be expanded in increments of four zones per unit. Each category 5 cable ends into a DAVES™-KP (In-Wall Amplifier Key Pad), for amplification and control. The DAVES™-KP delivers true high fidelity performance that actually rivals the sound quality of large stand-alone amplifiers. The unit has a built-in IR detector for remote control of source selection, volume up, volume down, and mute. It is available with IR-only control or IR with keypad.

The Pragmatic DAVES™ 4.4 offers outstanding input and output versatility, with 4 stereo sources in and 4 zones out, along with video feeds and local IR control. The DAVES™ 4.4 delivers DVD quality video over an astounding 1000 feet on category 5 cables and RS485 control. Even at that distance, there isn't a need for local AC connections, which saves time and money by eliminating secondary wiring. Local control is by keypad or IR control. Pragmatic's efficient digital amps deliver 12-48 watts directly into the speakers to match the detail of the video. The DAVES™ 4.4 has incredible features and versatility for its price. As simple to install as other category 5 wired systems with a stunning difference in sound quality and video detail.

Applications:

Multiple room audio system in residential markets
 Audio and Video supplied to rooms on category 5 cables
 In-wall amplification in up to 4 zones

Features & Benefits:

Cable runs up to 1000 ft. per zone
 Expandable in 4 zone increments
 High quality audio/video
 High quality audio amplifier
 Affordable price
 Easy to operate

Highly reliable
 Simple installation
 4 stereo sources in
 4 zones out
 Incredible sound quality and video detail

Architect Specifications:

The unit shall measure 16.75" W x 1.75" H x 9.75" D. It shall be housed in a standard rack unit. Its cable shall run up to 1000 feet per zone. It shall be expandable in 4 zone increments and produce high quality sound and video. It shall also have a high quality amplifier. The cable shall run from the main unit into an in-wall amplifier with keypad for amplification and control. It shall be reliable and simple to install and operate.

The unit shall be a Pragmatic DAVES™ 4.4.
