

DATASHEET

PH-4 and PH-16 : PADS™ Hub 4 and 16 Room Output

PH-4 Dimensions: 6" W x 2.75" H x 1" D
PH-4 Weight: 4 oz. Approx.
PH-4 Output: 4 rooms with loop out for expansion

PH-4

PH-16

The PADS™ hub receives line level stereo audio on a category 5 wire from any of the PADS™ transmitters. It then distributes it to rooms with power for the amplifiers on the category 5 wire. The PH-4 can distribute line level stereo audio to 4 rooms while the PH-16 can distribute it to 16 rooms. The system is infinitely expandable with the loop output.

The compact design of both the PH-4 and the PH-16 makes them the ultimate choice for home and commercial distributed audio applications.

Applications:

Audio transmission in schools, universities, businesses, department stores, etc.
Residential applications for intercom, music distribution, etc.

Ideal for new construction or retrofit applications on existing structured wires
Distribution for line level stereo audio with power to rooms on category 5 wire

Features and Benefits:

Compact design
Available in 4 rooms and 16 rooms configurations
Lightweight
Infinitely expandable

Architect Specifications:

The unit shall consist of either a 4 or 16 room hub that is infinitely expandable with the loop output. The 4 room hub shall measure 6" W x 2.75" H x 1" D and weigh approximately 4 oz. The hubs shall be able to receive line level stereo audio on category 5 wires from any of the PADS™ transmitters and distribute it to rooms with power for the amplifiers on the category 5 wire.

The unit shall be a Pragmatic PADS™ Hub.
