CATS™ Keypad

New Elegant Keypad Control for our highly distinguished CATS™ System

Now you can control your CATS (Complete Audio & Video Transmission System) from a wall-mounted control center. With its elegant brushed aluminum design, the CATS keypad will fit in with the most stylish of interiors. At the touch of a button, you can select any audio / video sources connected to your CATS network including local sources. You can control the volume, bass, treble, and balance in the room, and at the same time, also control and activate various lighting scenes, Heating, & Air Conditioning in your room !

With very high contrast, the keypad has a blue LCD display featuring variable intensity backlighting and automatic backlight compensation, that supports vision from all angles and lighting conditions.

Other cool features include:

- built-in temperature sensor
- ambient light sensor
- real time clock and calendar with alarm function
- intuitive menu driven operation and easy to use
- facilitates X-10, RS232 and RS485 based lighting control systems
- built-in IR detector that facilitates control of the A/V source from an IR remote control.
- fits in a 2 gang box

The CATS system, for which this keypad is designed, has truly been a breakthrough in the music/video distribution industry. With the ability of transmitting crystal clear video and audio signals up to 1000 ft on a single Category 5 cable, this system enjoys high reputation. Now, the same glorious system features this sleek keypad design that allows you to control up to 18 sources.

product specifications
