FOR IMMEDIATE RELEASE:

PRAGMATIC COMMUNICATIONS UNVEILS NEW COMPACT AMPLIFIER

Tiny size and big performance distinguish this powerful amplifier

(Santa Clara, CA, June 11, 2003) Pragmatic Communications Systems, a leader in audio/video control and signal distribution, re-announces yet another innovative twist on a conventional product. The SIWA™ (Stereo In-wall Audio Amplifier) is an extremely compact stereo amplifier where space is limited but the desire for high performance is not. Pragmatic's SIWA™, part of the company's Hideaway Series, is designed for a wide range of uses including kiosks, classrooms, boardrooms or small rooms around the home or office. This product offers high performance for applications where signals need to be transmitted over long distances.

The SIWA™ is only 2 ½" wide, 3½" high and 3" deep delivers 24, 36 or 48 watts per channel of continuous power. The SIWA™ is actually two discrete monoblock amplifiers in an in-wall case, delivering audiophile quality. The unit accepts any volume controlled line-level stereo (or mono) input via gold-plated phono inputs. Outputs are offered via high quality gold plated five-way binding posts. Powered is supplied via 12-15 VDC depending on the power of the amplifier.

Advanced protection circuitry guards against damage from overload, excessive temperatures or short circuits. Further, the SIWA™ runs cool and needs no heat sinks or vents thanks to its high efficiency amplifiers. The compact Pragmatic package delivers high fidelity performance rivaling the sound quality of large audiophile amplifiers at a fraction of the size and price.

The SIWA™ is available for immediate delivery. SIWA™ also offers reliability in various environments and is backed by a two-year warranty.

For more information, you may visit the company's website at www.wireless-experts.com or contact **James Davidson at 408 735 0300**.

Pragmatic Communications, located in the heart of Silicon Valley, was founded in 1994 by award- winning engineer Prasanna Shah. Based in Santa Clara CA, the company designs and manufactures its products in the U.S., for both professional and consumer markets.

Pragmatic, known for their proprietary CATS™ technology, provide products that are used throughout the world in demanding public safety, educational and entertainment applications. The company's products are marketed mainly to professional systems contractors.
